

How to Make a Nature Journal from a Paper Bag!

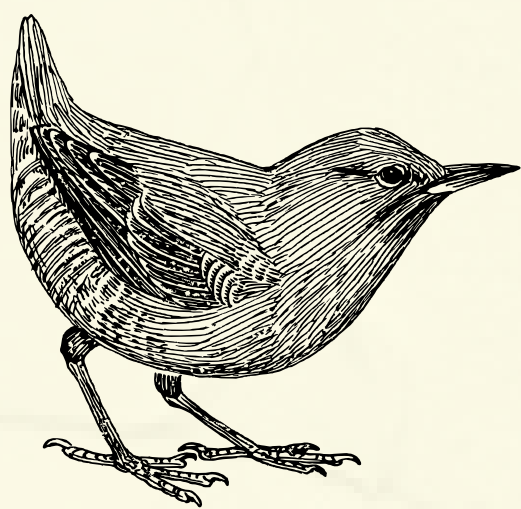

1

Grab a paper bag, and cut down the sides. We used a Countdown bag

2

Next fold the flaps with no handles, in to the middle and stick them down to give it some strength

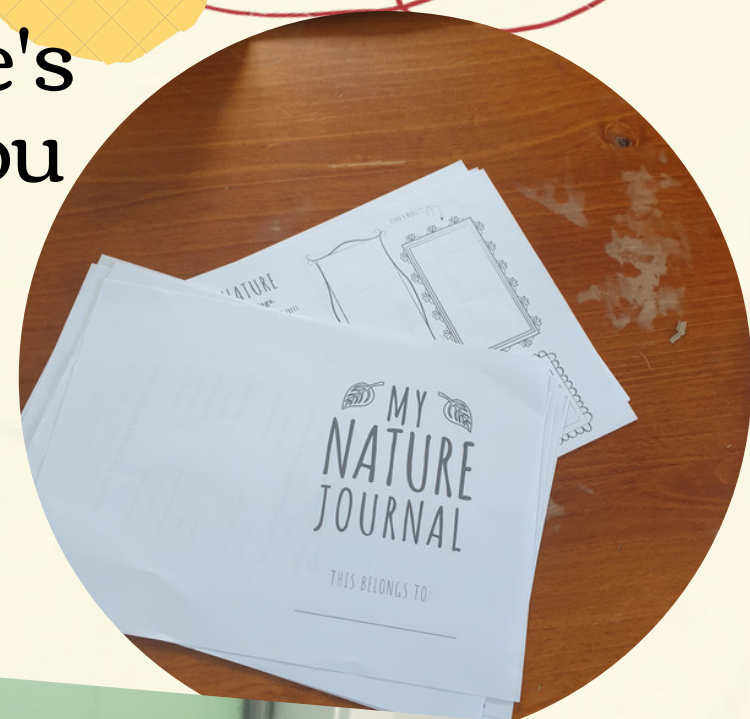

3

Cut the handles off, Fold the bag in three along the natural lines. Then re-stick the handles back on. One on the front then flip over and one on the back (make sure you line them up)

4

Now to fill it, we just searched for free printable's on line (print as A5) but you could also just fill with blank sheets.

Well done you made a Nature Journal!

5

To add a pen holder just cut a strip of cardboard (toilet rolls are good) than take it over a pen at the bottom
