

Craft a Kārearea Scrape: make your own falcon nest

Kārearea nest on the ground, often in the forest.
They 'scrape' out a bowl like shape by pushing their legs out backwards.
Lets have a go at making our own scrape!

You will need: A piece of paper, an old paper bag and glue.
Also, coloured pens, to add colour to the eggs.
Optional: Some twigs and small rocks and a glue gun.

- ① Draw or trace a rough circle onto your paper.

- ② Tear up bits of your paper bag and glue them around the circle.

- ③ Cut some egg shapes out of some of the scrap paper bag. Add speckles to your eggs and glue them in the middle of your scrape.

- ④ **Optional;** you can now chose to add some twigs and rocks if, you wish, for extra effect!
